Comment text:

As a resident of Wick my partner and I are wholeheartedly against the proposed boundary changes. Having been bought up in a city we moved to the area in 2005 as landlords of a village public house We embraced village life and although we no longer run a pub we choose to live in a village as we wish to be part of a small community Wick has come under the Fladbury ward for many years and should remain so Trying to bunch a rural community with a population of less than 400 in with a town of more than 7,000 can only lead to our village being poorly represented Wick is a rural village with thriving community groups, working farms and a generally older demographic. Our issues are not the same as those of Pershore town and it makes no sense to include a conservation area in with an expanding town We would be swallowed up and forgotten and will have no voice within a town ward We want our voice to be heard and this would not be a decision that could bring any benefit to our village
