Brunswick ward - The draft proposals show the northern boundary line for Brunswick ward cutting directly through a number of streets (Healey Street/Laburnum Street) therefore splitting streets into two different wards (Brunswick and Claremont). Although this is actually the current ward arrangements I do feel it would make sense to continue the boundary line between Claremont ward and Brunswick ward down Talbot Road up to Mather Street and then down Mather Street towards the existing boundary line. The community identity within the area is strong and adopting the above will not only set a clearer physical boundary for the electors but would also better reflect community interest and identity within the area.
