Comment text:

The Tuebrook/Stoneycroft ward has been overlooked for investment for the 35 years I have lived in it. That situation has become worse over the past 10/12 years. The only saving grace for the people of the ward is that our 3 councillors are hard working, committed and visible. They work as a partnership so that the area is always covered in the event of absences and there is always someone available. They provide some community benefits that other wards can only dream of. If this ward is divided, the people of an already deprived area, would suffer. What is needed in this ward is investment in the maintenance of the few facilities we have, and greater investment as a whole. To dilute the representation that we have now would not only divide the community, it would also weaken our chances of having anything done for the ward. The people of this ward value the work that our councillors do for us - work that, as individuals, they would be unlikely to continue. Please do not further deprive the voters of this ward.
