### Comment text:

I have looked at the ward boundaries and as a resident of Gerard Street L3 I have never connected with being part of the Everton ward as I always saw our estate as having more of a city centre connection. I think with our location being a dual carriageway away from the museum, art gallery and st George's hall. Therefore looking at your new boundary lines and the renaming of our ward to Scotland road I am still unsure as to why our estate would fall within this boundary. We are an area set apart from Scotland road sitting behind the university and as stated just behind the museum and art gallery. If anything I would say our estate is more connected to the holy cross estate which falls within city centre north and sits in front of the university and our estate is behind the university yet we are being classed as Scotland road. . If I was to say which ward I felt more connected to it would be city centre north. I would therefore like to oppose the renaming of our ward to Scotland road and would like it to be enclosed within the city centre north boundary line instead. Thanks
