Organisation Name:

### Comment text:

What on earth are you playing at? Leave the boundaries as they already exist!, What is the precise rational for this fiasco and please be specific about the precise cost. Who will benefit from the changes. I have no doubt that there are political drivers at work. There seems to be no money to cut verges and where they have been finally hacked at, the mess will end up clogging the drains. Whatever the cost for these changes are they should be better spent on services to benefit to the community.
