### Comment text:

I strongly object to this proposal due to the greatly increased traffic that will be coming in and out of the site at all hours. This will have a negative effect on the quality of life for all of the residents in the area. This is a quiet residential area where many elderly people and young families live. Air quality from the delivery vans will be dramatically reduced. This has been shown to have a negative impact on the health of children and can contribute to asthma and other breathing problems. This is the wrong place to have a main sorting office and must be turned down.
