Comment text:

I want to fully support the submission made by North Lodge Parish Council. That the Northern area of Chester-le-Street, containing North Lodge Parish Council is a specific community within the town. This area has natural boundaries with the river Wear to the East, the railway line to the West, and Pelaw Bank/the burn running through the town centre to the South. This area faces North to Gateshead and Newcastle, having stronger bus links with them as opposed to Durham to the South. They have a similar street scene across the area and are centred around the North Lodge School which is the principle community centre/sports facility for the community.
