Comment text:

Dear Sirs

I am a resident in Fulmer and I have learnt that there is a proposal for a change in the boundaries to tie Fulmer with Farnham an area which is further than our current boundary with Gerrards Cross.

There are absolutely no benefits for the local community of Fulmer to be joined with Farham due to the current ties and the joint services of churches, schools, public transportation facilitates, youth social clubs such as the scouts, football, tennis, rugby etc, sporting amenities, adult education and social care with Gerrards Cross have been in place for many years. The lost of that access would be devastating for the local communities of Fulmer and something with all respect that Farnham would never be able to provide without huge amounts of funding by the local council and independent investment, especially with the current economic climate will take many years to be able to provide and service.

Finally by moving the boundaries there are very little benefits or gain politically due to the numbers involved and representation.

I hope that for the community of Fulmer we are heard and for us to continue to be serviced by an area to which we already have close bonds with and in an area which distantly is close to our village.

Kind regards
