Comment text:

Parish Boundaries. In you technical guidance you state '1.12 When conducting electoral reviews in areas that are parished, we try to use parishes as building blocks for new wards or divisions.' In regard to your Codicote and Kimpton proposal you ignore this. Please explain why? Forecast Populations. You proposals are based upon forecast populations which are a fallacy. Please provide evidence of how these populations were arrived at. Type of area. Your proposal groups urban areas with rural areas. These areas require differing approaches and your proposal will reduce the quality of governance. How will you mitigate this retrograde step?
