Comment text:

The number of Wards seems adequate already. Even if you consider that most wards could be logically split in two, that would still only give around half the number recommended by the commission. Therefore I think the proposal to have 42 wards is disproportionate. In any case the number of wards should take account of the number of people in the ward, so Oxted for example might need to be split, while Bletchingley & Nutfield are currently combined.
