### Comment text:

The changes to the proposed castle ward are perhaps creating a a small area around Rushmere Road, Cranmere Avenue (currently the dividing line) that would have a more natural geographic, travel and socio economic linkage to either the Weston or Phippsville wards. for example issues local to this area (such as Abington park, local schools, doctors, road junctions etc) are much more aligned to either of these wards. Certainly Houses either side of Rushmere should be in the same ward. I fully appreciate there will always be boundary issues, but give the relatively low level of homes involved a slight revision to better align natural geographies on this border would be beneficial. Likewise, there areas of deprivation in Castle ward rightly require interventions to address the needs of local residents and these may be diluted to some extent by the inclusion of the larger area.
