The Council doesn't need 3 Councillors per ward who are paid £1000 a month , given a laptop znd a phone. 1 would be enough saving quite a bit of money. This is a total waste of public money. Perhaps they should ve more open on what they get. It's also time that the staff get back to the offices as they are lacking cross training and communication skills. Also its often difficult to speak to them.

Long term its also a recipe for bad backs, poor mental health, increased weight etc unless the Council have provided them with the correct chairs and desks . The above increases more illness resulting in poorer productivity. They say they are short of money so why not take a serious look at some of the things they do outside of the Borough instead of the leisure side which they are killing off with increased prices. They should be for the people of Gateshead to enjoy and increase physical activity , increasing participation , reducing obesity and improving mental health.
