Comment text:

With respect to Eccleshall division, there are some settlements which would naturally align themselves into the division as they use the same local facilities for social, shopping & work such as Ellenhall, High Offley & Woodeaves. This would propose moving the boundary south to the approximately the line of the B5404 to Great Bridgeford road. Equally at the northern edge, it would seem the settlements above the A51 should be more linked to rural Newcastle and east of the M6 to rural Stone. If the aim or intention is to reduce the divisions then there would be synergies in including villages of Gnosal, Haughton, Ranton ie A518 line to within the Eccleshall division allowing the settlements further to the south to be in the Brewood division. I would not support enlargement as the representation of no of people around 12-14,000 people seems reasonable.
