Comment text:

Regarding the current ward boundary review, I support the suggestion of a resident to create three wards in west Worcester as opposed to the two ward recommendation in the draft. It makes much more sense rather than splitting the heart of St John's across the middle.

I would also comment on the level of building by other councils (Wychavon and Malvern Hills particularly) up to the city boundary, touched on by the same resident. It seems unfair to city tax payers if those councils are meeting their building targets by building so close to the city but the city is not receiving the tax receipts needed to supply the services provided that those residents will certainly use. Is it time to redraw the city boundary too?
