Related subject: Change of boundary for nunnery warr

I don't think the boundary should change as we have always been part of the nunnery ward and do not think that we should be moved to the gorse hill ward because of a new development my go in the nunnery ward my local supermarket, plus family and friends for support are all in the nunnery ward. I would also like to add that tolladine is predominantly a council/housing association area and we are a privately owned estate and when we have had trouble in the past we have been well supported by our nunnery councillor to best representative our community. I feel that the change would negatively impact our property value and the attraction of new buyers. We have access to nunnery by a footpath which a eco friendly time represents direct access and therefore strong links to that community. I will be contacting my councillor and the local community to oppose these plans.
