Sunderland Ward Boundary Review

Submission by Washington & Sunderland West CLP

Washington and Sunderland West Constituency Labour Party welcome the decision of the Boundary Commission to provide a short extension to the deadline for this initial public consultation stage on the linkage of communities within the city boundaries that make up the 25 current wards and their proposed revision.

In making our submission we have taken the knowledge from our Councillors, wider party membership, as well as our local residents with a view to help ensure that there is minimum disruption to existing communities. In doing so we have adhered to some key criteria in coming to our conclusions as follows:

Criteria 1

We believe that it is essential to ensure that revised ward boundaries are co-terminus with the new parliamentary boundaries now in place that will impact on Sunderland as a whole and our constituency, as referenced below:

- Washington and Gateshead East
- Houghton and Sunderland South
- Sunderland Central

Due to this being our overriding priority, we believe the commission should take each parliamentary boundary in turn to show how, in our opinion, we can ensure that residents in each of the 25 wards will have both a consistent set of Councillors but also their member of Parliament.

Our detailed assessment within this submission will show how this can be achieved within our own revised constituency boundaries.

Criteria 2

We note the number of electors proposed by the commission for their key target date of 2029 and, considering there is no proposal to remove the existing 3 councillors for each ward, that the average number of electors as set by the commission for the

revised 25 wards will be 8847 within 10% tolerance levels of 7963 (Min) and 9731 (max).

Looking at existing ward boundaries within our constituency we have therefore looked to ensure a minimum disruption to current community boundaries except:

- a. Where there is a requirement to amend community boundaries to meet minimum/maximum thresholds set by the commission,
- b. Where there is a need to right any anomaly that may have arisen from the previous review,
- c. Where a change relates to a direct request from residents to move community boundaries,

Please therefore find enclosed below our submission to the Commission for consideration on community boundaries within the City of Sunderland, specifically relating to those wards within the new Washington and Gateshead East Parliamentary Constituency.

Yours sincerely

Councillor Paul Stewart,
Chair, Washington & Sunderland West CLP

Washington and Gateshead East Proposals

The current review will impact on the following wards within the boundary of the new parliamentary constituency of Washington & Gateshead East:

- Redhill
- Castle
- Washington North
- Washington East
- Washington West
- Washington South
- Washington Central

The total proposed electorate for these wards by 2029 will be 59,814, with an average 8545 electors per ward or 2848 electors per councillor. These are well within the tolerance levels of the boundary commission and allow for the existing number of wards (7) to be maintained within the new parliamentary boundary.

In applying our criteria, we therefore propose the following new revised ward boundaries.

Redhill Ward

This Ward is situated on the border with the neighbouring constituency of Sunderland Central. With a proposed electorate of 8171 in 2029, this will be within the tolerance levels set by the commission, and we therefore propose no change.

This will ensure that the whole community within Redhill Ward will have the same member of parliament as they do at present and meet the criteria we have set to minimise community disruption.

Recommendation

We therefore propose no change to Redhill Ward

Castle Ward

Resting between Redhill Ward and the A19 the proposed electorate in 2029 of 8261 electors is also within the tolerance levels set by the commission and therefore we consider there is no requirement for a change in ward boundaries at this time.

This will ensure that the community within Castle Ward will meet the criteria we have set to minimise community disruption.

Recommendation

We therefore propose no change to Castle Ward

Washington South

In having a proposed electorate of 7838 in 2029, Washington South is the only ward within this constituency that will have an electorate below the threshold set by the Commission.

In looking at options for increasing the electorate to ensure compliance with the commission, we have considered a number of options. In reviewing these we have been also guided by the geography of the ward and the current significant road barriers between local communities consisting of the A1(M), A1231, A182 and A195.

This in our opinion leaves only one realistic option for increasing the existing electorate of Washington South through the adding an additional part of the Lambton community from Washington Central (polling district V01).

We have therefore looked at several options relating to the community of Lambton and the subsequent impact this will have on ward boundaries across Washington.

Option 1

A minimalist approach to the disruption to the community of Lambton, which is currently already split between both wards, would be through simply extending the boundary with Washington South along Malvern Road. This would consist of moving the following streets into Washington South from Washington Central (district V01) and provide for an additional 340 electors (based upon the electoral register in June 2023).

- Cotswold Close (117 electors)
- Caradoc Close (75 electors)
- Chiltern Close (65 electors)
- Malvern Road No 1-49 (83 electors)

This option will ensure the revised electoral figures for Washington South of 8178 and within the minimum thresholds set by the commission.

Option 2

We did look at consideration of moving the whole community of Lambton into Washington South (the electoral register at June 2023 showed this as 1118 electors) and while this would ensure the community boundaries were retained, we have rejected this as a realistic option due to impact on Washington Central and the subsequent requirement to significantly amend its boundaries beyond the A1231 or A195, resulting in considerable disruption to communities within other parts of Washington.

Recommendation

We consider option 1 to be viable solution for increasing the electorate for Washington South and, through adhering to our set criteria, will cause minimum disruption and on balance we are recommending this to the commission.

Washington Central

Washington Central will have an electorate of 8541 by 2029 and is therefore compliant within the criteria set by the commission. The boundary of the existing community rests predominantly between the major road network of the A1231 and

the A195. These are considered significant barriers to local communities and movement beyond these, we believe, should only be considered if there are no other options to ensure compliance with the min/max criteria set by the commission.

In applying our own criteria that has governed this submission we would have recommended no change, but for the need to move some of the electorate in district V01 into Washington South that will reduce Central ward by 340 electors (see Washington South proposals for details).

In addition, the local councillors for both Washington East and Central have received representations as part of their local consultation from residents to move their isolated community within Washington East (district W05) into Washington Central, the impact being an increase of 179 electors as at June 2023. The streets affected are:

- Barmston Close (34 electors)
- Barmston Court (76 Electors)
- Station Road (12 electors)
- Lakeside Gardens (57 electors)

Though this suggestion goes against our guiding criteria, the voice of the residents were clear that they consider themselves part of the wider community of Columbia, which is based within Washington Central.

The loss of 340 electors to Washington South and the gain of 179 electors from Washington East will result in 2029 an electorate of 8380.

Recommendation

We consider this to be viable solution for increasing the electorate for Washington South and accommodating the specific request from a small number of residents in Washington East. Following our set criteria this will be achieved with minimal impact on the current community of Washington Central. On balance we are recommending these changes to the commission.

Washington North

The proposed size of North Ward in 2029 of 8688 does not require any adjustment. However, local councillors from Washington North and West have received representations from residents in the following area, currently within Washington West (district of Z04), and for these areas to be moved into Washington North.

- Well Bank Road – Part only up to George Washington primary (183 electors)
- Kellett Close (42 electors)

We consider this a relatively minor change to reflect residents requests and will have a slight impact of increasing the electorate of Washington North to 8813 and reduce the size of Washington West by 125 electors.

Recommendation

We therefore recommend these minor changes to the commission for Washington North at the request of residents, while ensuring we adhere to our criteria of minimising disruption to the community.

Washington East

Washington East will have a proposed electorate of 9124 in 2029 and is therefore within the tolerance levels set by the commission and therefore, under these circumstances, we would propose no change in the community boundaries.

However, we have received a request from residents in a relatively isolated community within Washington East (district W05) to move into Washington Central, the impact being an reduction of 179 electors for the East ward. For details, please see proposals for Central ward.

We consider this a relatively minor change to reflect residents requests while ensuring that disruption to the community within Washington East Ward is minimised.

Recommendation

We consider this to be a viable solution for Washington East to accommodate the specific request from a small number of residents and on balance we are recommending these changes to the commission.

Washington West

Washington West will have a proposed electorate of 9191 in 2029 and is therefore within the tolerance levels set by the commission and does not require any adjustment.

However, as referenced earlier, local councillors in Washington North and West have received representations from residents in the following area currently within Washington West (district of Z04) and for these areas to be moved into Washington North.

- Well Bank Road – Part only up to George Washington primary (183 electors)
- Kellett Close (42 electors)

This will have an impact of increasing the electorate of Washington North by 125 electors and reduce the size of Washington West to 9066 electors.

Recommendation

We therefore recommend these minor changes to the commission for Washington West at the request of residents, while ensuring we adhere to our criteria of minimising disruption to the community.

Conclusion

The outcome of these recommended proposals for electorate size in 2029, within the new constituency of Washington and Gateshead East, would be within the tolerance levels set by the commission and achieved with the minimum disruption to local communities as shown below:

	Electors as at 2029 with current boundaries	Electorate in 2029 if recommendations accepted
Castle	8261	8261
Redhill	8171	8171
Washington South	7838	8178
Washington Central	8541	8380
Washington North	8688	8813
Washington West	9191	9066
Washington East	9124	8945

We therefore recommend these proposals, relating to the new constituency of Washington and Gateshead East to the commission for consideration.

Hi Paul

Please find a copy of the submission from Washington and Sunderland West Constituency Labour Party in relation to the current review of ward boundaries in Sunderland. They have also been uploaded online via your website.

Big thank you for the extension to the deadline as its allowed us to complete our proposals as we were struggling somewhat.

Best wishes

Paul

Sunderland Ward Boundary Review

Submission by Washington & Sunderland West CLP

Washington and Sunderland West Constituency Labour Party welcome the decision of the Boundary Commission to provide a short extension to the deadline for this initial public consultation stage on the linkage of communities within the city boundaries that make up the 25 current wards and their proposed revision.

In making our submission we have taken the knowledge from our Councillors, wider party membership, as well as our local residents with a view to help ensure that there is minimum disruption to existing communities. In doing so we have adhered to some key criteria in coming to our conclusions as follows:

Criteria 1

We believe that it is essential to ensure that revised ward boundaries are co-terminus with the new parliamentary boundaries now in place that will impact on Sunderland as a whole and our constituency, as referenced below:

- Washington and Gateshead East
- Houghton and Sunderland South
- Sunderland Central

Due to this being our overriding priority, we believe the commission should take each parliamentary boundary in turn to show how, in our opinion, we can ensure that residents in each of the 25 wards will have both a consistent set of Councillors but also their member of Parliament.

Our detailed assessment within this submission will show how this can be achieved within our own revised constituency boundaries.

Criteria 2

We note the number of electors proposed by the commission for their key target date of 2029 and, considering there is no proposal to remove the existing 3 councillors for each ward, that the average number of electors as set by the commission for the

revised 25 wards will be 8847 within 10% tolerance levels of 7963 (Min) and 9731 (max).

Looking at existing ward boundaries within our constituency we have therefore looked to ensure a minimum disruption to current community boundaries except:

- a. Where there is a requirement to amend community boundaries to meet minimum/maximum thresholds set by the commission,
- b. Where there is a need to right any anomaly that may have arisen from the previous review,
- c. Where a change relates to a direct request from residents to move community boundaries,

Please therefore find enclosed below our submission to the Commission for consideration on community boundaries within the City of Sunderland, specifically relating to those wards within the new Washington and Gateshead East Parliamentary Constituency.

Yours sincerely

Chair, Washington & Sunderland West CLP

Washington and Gateshead East Proposals

The current review will impact on the following wards within the boundary of the new parliamentary constituency of Washington & Gateshead East:

- Redhill
- Castle
- Washington North
- Washington East
- Washington West
- Washington South
- Washington Central

The total proposed electorate for these wards by 2029 will be 59,814, with an average 8545 electors per ward or 2848 electors per councillor. These are well within the tolerance levels of the boundary commission and allow for the existing number of wards (7) to be maintained within the new parliamentary boundary.

In applying our criteria, we therefore propose the following new revised ward boundaries.

Redhill Ward

This Ward is situated on the border with the neighbouring constituency of Sunderland Central. With a proposed electorate of 8171 in 2029, this will be within the tolerance levels set by the commission, and we therefore propose no change.

This will ensure that the whole community within Redhill Ward will have the same member of parliament as they do at present and meet the criteria we have set to minimise community disruption.

Recommendation

We therefore propose no change to Redhill Ward

Castle Ward

Resting between Redhill Ward and the A19 the proposed electorate in 2029 of 8261 electors is also within the tolerance levels set by the commission and therefore we consider there is no requirement for a change in ward boundaries at this time.

This will ensure that the community within Castle Ward will meet the criteria we have set to minimise community disruption.

Recommendation

We therefore propose no change to Castle Ward

Washington South

In having a proposed electorate of 7838 in 2029, Washington South is the only ward within this constituency that will have an electorate below the threshold set by the Commission.

In looking at options for increasing the electorate to ensure compliance with the commission, we have considered a number of options. In reviewing these we have been also guided by the geography of the ward and the current significant road barriers between local communities consisting of the A1(M), A1231, A182 and A195.

This in our opinion leaves only one realistic option for increasing the existing electorate of Washington South through the adding an additional part of the Lambton community from Washington Central (polling district V01).

We have therefore looked at several options relating to the community of Lambton and the subsequent impact this will have on ward boundaries across Washington.

Option 1

A minimalist approach to the disruption to the community of Lambton, which is currently already split between both wards, would be through simply extending the boundary with Washington South along Malvern Road. This would consist of moving the following streets into Washington South from Washington Central (district V01) and provide for an additional 340 electors (based upon the electoral register in June 2023).

- Cotswold Close (117 electors)
- Caradoc Close (75 electors)
- Chiltern Close (65 electors)
- Malvern Road No 1-49 (83 electors)

This option will ensure the revised electoral figures for Washington South of 8178 and within the minimum thresholds set by the commission.

Option 2

We did look at consideration of moving the whole community of Lambton into Washington South (the electoral register at June 2023 showed this as 1118 electors) and while this would ensure the community boundaries were retained, we have rejected this as a realistic option due to impact on Washington Central and the subsequent requirement to significantly amend its boundaries beyond the A1231 or A195, resulting in considerable disruption to communities within other parts of Washington.

Recommendation

We consider option 1 to be viable solution for increasing the electorate for Washington South and, through adhering to our set criteria, will cause minimum disruption and on balance we are recommending this to the commission.

Washington Central

Washington Central will have an electorate of 8541 by 2029 and is therefore compliant within the criteria set by the commission. The boundary of the existing community rests predominantly between the major road network of the A1231 and

the A195. These are considered significant barriers to local communities and movement beyond these, we believe, should only be considered if there are no other options to ensure compliance with the min/max criteria set by the commission.

In applying our own criteria that has governed this submission we would have recommended no change, but for the need to move some of the electorate in district V01 into Washington South that will reduce Central ward by 340 electors (see Washington South proposals for details).

In addition, the local councillors for both Washington East and Central have received representations as part of their local consultation from residents to move their isolated community within Washington East (district W05) into Washington Central, the impact being an increase of 179 electors as at June 2023. The streets affected are:

- Barmston Close (34 electors)
- Barmston Court (76 Electors)
- Station Road (12 electors)
- Lakeside Gardens (57 electors)

Though this suggestion goes against our guiding criteria, the voice of the residents were clear that they consider themselves part of the wider community of Columbia, which is based within Washington Central.

The loss of 340 electors to Washington South and the gain of 179 electors from Washington East will result in 2029 an electorate of 8380.

Recommendation

We consider this to be viable solution for increasing the electorate for Washington South and accommodating the specific request from a small number of residents in Washington East. Following our set criteria this will be achieved with minimal impact on the current community of Washington Central. On balance we are recommending these changes to the commission.

Washington North

The proposed size of North Ward in 2029 of 8688 does not require any adjustment. However, local councillors from Washington North and West have received representations from residents in the following area, currently within Washington West (district of Z04), and for these areas to be moved into Washington North.

- Well Bank Road – Part only up to George Washington primary (183 electors)
- Kellett Close (42 electors)

We consider this a relatively minor change to reflect residents requests and will have a slight impact of increasing the electorate of Washington North to 8813 and reduce the size of Washington West by 125 electors.

Recommendation

We therefore recommend these minor changes to the commission for Washington North at the request of residents, while ensuring we adhere to our criteria of minimising disruption to the community.

Washington East

Washington East will have a proposed electorate of 9124 in 2029 and is therefore within the tolerance levels set by the commission and therefore, under these circumstances, we would propose no change in the community boundaries.

However, we have received a request from residents in a relatively isolated community within Washington East (district W05) to move into Washington Central, the impact being an reduction of 179 electors for the East ward. For details, please see proposals for Central ward.

We consider this a relatively minor change to reflect residents requests while ensuring that disruption to the community within Washington East Ward is minimised.

Recommendation

We consider this to be a viable solution for Washington East to accommodate the specific request from a small number of residents and on balance we are recommending these changes to the commission.

Washington West

Washington West will have a proposed electorate of 9191 in 2029 and is therefore within the tolerance levels set by the commission and does not require any adjustment.

However, as referenced earlier, local councillors in Washington North and West have received representations from residents in the following area currently within Washington West (district of Z04) and for these areas to be moved into Washington North.

- Well Bank Road – Part only up to George Washington primary (183 electors)
- Kellett Close (42 electors)

This will have an impact of increasing the electorate of Washington North by 125 electors and reduce the size of Washington West to 9066 electors.

Recommendation

We therefore recommend these minor changes to the commission for Washington West at the request of residents, while ensuring we adhere to our criteria of minimising disruption to the community.

Conclusion

The outcome of these recommended proposals for electorate size in 2029, within the new constituency of Washington and Gateshead East, would be within the tolerance levels set by the commission and achieved with the minimum disruption to local communities as shown below:

	Electors as at 2029 with current boundaries	Electorate in 2029 if recommendations accepted
Castle	8261	8261
Redhill	8171	8171
Washington South	7838	8178
Washington Central	8541	8380
Washington North	8688	8813
Washington West	9191	9066
Washington East	9124	8945

We therefore recommend these proposals, relating to the new constituency of Washington and Gateshead East to the commission for consideration.
