**Related subject:** All Saints

I totally disagree with this proposal as I feel that the ten centre should have its own focus, I also think the proportion of amenities and green areas will be unfair for example the new area would incorporate The Pleasure Park and North Park which have long been the focus of community spirit and activities for the north end of Kettering including brambleside residents. I believe the money allocated after the boundary change will be unfair and The North End will lose out. I also think that our Green Party Councillors in All Saints etc have been exemplary in bringing these communities together and have led by example. The new boundary change to bring it into the town centre and beyond will be to the detriment of our community. I don't agree that change will improve things for the town as a whole therefore  
I say NO
