## Comment text:

**Related subject:** Boundary commission changes

I live on the very edge of houghton and Hetton. Based on the proposals this means that I would fall into having a member of Durham council represent me at parliament. This dose not provide political and community voice for for someone who lives in sunderland and pays council tax to such. Why would a member of a neighbouring council represent the views of those of a different council area. You may as well have someone in Yorkshire represent. Either sunderland is losing this area to Durham council and as such the money from council tax or members of the council who serve the area should represent it.
