Related subject: Nash

I am against the proposals, especially for Nash. I feel that it would be a very bad move if Nash had to go to Cleobury Ward. I don't think that cleobury council will have the same understanding of and interest in our village/hamlet, and the surrounding ones as a local councillor like our present one who lives on Clee Hill. Towns have different values, ideas, outlooks and priorities from the needs of more rural areas such as ours. It seems completely unnecessary and a total waste of effort and no doubt a great deal of money to change something that has been working perfectly well and would continue to do so without making such changes. None of my neighbours are happy about this proposal, I have not heard one person say 'what a brilliant idea!'.... But I have heard plenty say that it's a complete waste of time and they are VERY unhappy with the proposals, as am I and all my family. I sm also not too happy that this proposal wasn't brought to the attention of everyone in the parishes, not everyone is online or spends all day looking at the Council website. Why were no letters sent?? Something as important as this should surely warrant a letter to each household letting them know so that they had the chance to state their views? This could affect rural areas significantly and it's as though the Council wanted to keep it quiet and push it through without anyone noticing ?????
