I strongly support moving away from Bradford Council. We are purely a cash cow for them. We get virtually no service from them apart from emptying the bins and that is a poorer service than others where they empty green waste for free. The library is now run by Burley residents and we never see police.

The grass on the road sides is also cut only once a year which is dangerous for visibility.

Bradford Council agreeing to destroy green belt for development against all local opinion is also scandalous and purely financially motivated.
