**Related subject:** The boundary between South Darley/Oker and Snitterton

I first moved to Darley Bridge in 1987, I was married in the church, my children were born here and attended South Darley School as did many of their friends from Oker and Snitterton and Wensley. These small villages have always operated as one in terms of community issues. What effects one of us generally impacts on the other. We share our school, village hall, church, a variety of societies/ groups and Wensley reading rooms. It is an example of a cohesive community, an example which is sadly becoming rarer these days. Can I please ask that Boundary Commission follow the parish/town boundary in this area, and NOT the district wards for the sake of this community.
