Related subject: Belper

I may be misinterpreting the boundaries, but I believe that Belper is effectively split into three areas in terms of Amber Valley council representation with the town running through the middle to Far Laund, and the Parks estate and by the mill being part of other wards. For me, like the parish boundaries Belper should be a unified entity as it seems fractured compared to the other boundaries, with very different make-ups of the areas that have been combined together.
