## Comment text:

I strongly object to the plans to remove of Jacobs Well from Worplesdon Division. WE have always been identified with Worplesdon division as semi-rural, which we would lose if swallowed up into North Guildford which is a more urban area. Jacobs Well has been served ably in the past and the present by Worplesdon Parish Councillors. They have supported us against many proposals detrimental to the village, kept us informed of decisions made at Parish and County level. Why would we then be voting for a County Councillor who will be representing the interests of an entirely different area to the detriment of our own village/ area. We like the way it is now with Councillors who have the knowledge about the areas they represent.

In your draft recommendation you state, 'Our task is to strike the best balance between these three considerations when making our recommendations' and 'Ensuring that the recommendations reflect community identity'. Clearly Jacobs Well has not been considered this way. If you lump us in with North Guildford, we will lose this, which are not prepared to do.
