With reference to your proposal for boundary changes regarding Elmdon Solihull.

I cannot understand your logic for this, considering all councils are currently in a low financial situation. Surely this would be a complete waste of public money being spent on having to redraw boundary maps, employing extra staff to carry this out and also spending on new heading for stationary etc. Would it not be far more sensible to keep and use any monies available for any further improvements which may occur within current constituencies. As an example, we have recently lost a church /community hall next to Elmdon Park.
