**Related subject:** st stephens and blean and any other areas affected by my comment

Why do some areas with simliar amounts of residents not have the same amount of councilors? In particular why does Blean have 3 councilors it has less residents than St Stephens which only has two. This seems to be an oversight which should be addressed. There should be equal numbers based on population. Clearly St Stephens should have three if Blean have three and have a smaller population?
