**Related subject:** proposal to change boundaries

I strongly disagree with the proposal to remove hollycarrside from Ryhope Ward.

The only reason you are suggesting this change is due to the rise of new houses being built in the area. In effect this is causing each area to become over populated. Why should we have to loose the area that we live in. You have to understand that this is not just a place where we live. Ryhope prides itself in being a very strong community. I was born and bred in Ryhope and I would like to continue to do this. My family all rely and benefit from the services (Doctors, schools, community centre) provided in Ryhope.

I am worried that you will be isolating us by changing wards. We rely on public transport and are familiar with all the bus routes in Ryhope. Changing wards will therefore mean a change in bus routes.

Can you guarnatee when changing wards that children can still apply to go to schools in Ryhope, as I would prefer if any children of mine could attend the local catholic primary school. This is very important to myself as I attend the catholic church within Ryhope.

When looking at the wards geographically, it would clearly make more sense to have toll bar road as the natural boundary for Ryhope.

I honestly can't see what benefits we will gain from this. I believe that Sunderland Council have not provided a good enough arguement for this.
