Organisation Name: Chickenley Community Centre (Representative of a local organisation)

Comment text:

Dear Commissioners,

As a local community centre deeply embedded in the fabric of our neighborhood, we are deeply concerned about the proposed changes to the boundaries of Dewsbury East Ward, particularly District DE07. Our centre relies heavily on the existing transport infrastructure and highway network to serve the needs of families and individuals within our ward.

The proposed division of DE07 using the main Huddersfield train line would have a significant impact on our ability to provide essential services and support to our community. Many of the families we serve depend on reliable transportation options to access our center and participate in our programs. Disrupting these transportation links could isolate vulnerable members of our community, making it difficult for them to access the resources and assistance they need.

Moreover, any changes to the boundaries could also have a detrimental effect on our funding. Our centre relies on funding allocations tied to our ward designation, and any alterations to these boundaries could jeopardise our ability to secure the necessary resources to continue our vital work. This could ultimately result in a reduction in the services and support we are able to offer to families and individuals within DE07.

In conclusion, we urge decision-makers to reconsider the proposed changes to the boundaries of Dewsbury East Ward, taking into account the significant impact it would have on our ability to serve our community. Preserving the existing boundaries is essential for ensuring continued access to our services and support, and for maintaining the well-being of families and individuals within DE07.

Sincerely,

Chickenley Community Centre
