**Related subject:** Palfrey

I'm writing to recommend the renaming of the "Palfrey" ward to "Palfrey & The Delves". This is due to the distinct characteristics between the two areas, as many residents of each respective neighbourhood would not necessarily consider themselves to come under the banner of the other.

Many residents of the current "Palfrey" ward, especially those to the south of the Broadway main road, would consider themselves residents of The Delves, rather than Palfrey. I say this as a longtime resident of this area, my location at the southern boundary of the ward leaves me feeling misrepresented by the naming of the current council ward.

It would be interesting to consider the current population of The Delves area in comparison to that of Palfrey, as it seems likely that they both contribute a similar number of residents to the current ward. For these reasons, I feel it necessary to argue the case for a renaming of "Palfrey" ward, to better represent the constituents represented within it.

I look forward to hearing you response.

With kind regards,
