Related subject: Mannington and Western Ward

Mannington and Western is not a distinct, unified area recognised by residents. It comprises 2 entirely different areas separated by Great Western Way dual carriageway and an industrial area. There is no interaction between the 2 communities. Western - is high density Victorian terraced housing. Mannington is a 1970s urban expansion area. Concerns and issues are entirely different between the 2 areas and the residents use different schools, shops medical and other facilities. They should both be reunited with their respective hinterlands of a similar character to provide electoral areas that make sense to their local residents.
