Related subject: Ward border adjustment recommendation (Ward border concerning Lamesley & Birtley north and Birtley south)

I believe that the ward border between Lamesley & Birtley north and Birtley south should be amended to better suit the communities needs and identity that make up these two sub-divisions. (See attached document)

If this ward border change is put into effect it will I propose that the ward should be named Birtley and the ward of Lamesley & Birtley north should be renamed to Lamesley. The new Ward of Birtley will serve its residents better as the border now correlates with the commercial, industrial, leisurely and other uses of the residents that live there, I believe in this as with residents that previously resided with the Ward of Lamesley & Birtley north didn't vote on matters that concerned Birtley south even though they use many of the services that is provided which is not allowing them to voice their thoughts, concerns, and praises on how the area is ran and what changes it goes through. I strongly believe that with this new border a sense of greater community and togetherness will be fostered as the amended border does away with division through streets and houses.
