I am completely against the proposed boundary move, as an individual who has been in the area since the age of 9 - I am now 40 and have enjoyed being an active part of the local community. Furthermore as a father of two young children , a major reason for remaining within the local area was to benefit from being in the catchment area for Haybridge and Hagley schools (schools I also attended) - If the boundary change happens, we will no longer be in that catchment area and therefore pushes out people who have lived and been part of the community for a long time.
