## Comment text:

**Related subject:** Belbroughton

I'd strongly object to the changes to the boundary line. Belbroughton is my village and I have a strong sense of community and ties to the area. I walk my dog daily into the village from my home and I frequent the shops, pubs and deli.

I am reliant on my doctors at glebeland because I have significant health issues and the doctors is the best in the area for my needs.

Moving the boundary of my house to Catshill will increase my carbon footprint because i would need to enter bromsgrove for my council/parish needs, which is on a dual carriageway which I would need to drive to be apart of that community. This is not conducive to helping the government move to net zero!

I'm starting a family, as a young, professional, my closest school is in belbroughton, which is not at capacity whereas the catshill schools are at max capacity (and belbroughton has a great reputation as a fantastic school).

This boundary proposal came without notice to me or my neighbours and we had to find out on Facebook! For something that would change peoples lives I think this is an awful consultation process.
