**Related subject:** Bell Heath

I am not happy with the proposals affecting Woodfield lane and the surrounding areas. I am unable to identify any benefits for residents and believe the proposed benefits for the council are weak and not substantial enough to justify the upset and frustration that residents will experience.

We proudly moved to this area 6 years ago, feeling that we had achieved our dream of living in a semi rural area with an excellent reputation and a good community . Removing or diluting the identity of our area will damage both the community bond and the high regard/reputation of the addresses in our area. I also believe that there will also be a negative impact on house prices.

Woodvale does not resonate with me at all and my initial thoughts were of woodgate, a very different area.

We already have to deal with the fact that our postcode is Halesowen, our address is Romsley, our parish is Belbroughton and the signage says Bell Heath. This proposal adds yet another layer to this!

I worry about the affects on eligibility for local schools and doctors

I have been alerted by a neighbour earlier today of these proposals, giving me just a few hours to consider and respond. How can you consider this to be a fair consultation when those directly affected have not been made aware. Why are you avoiding transparency? As a minimum, I ask that you extend the consultation period and properly notify all those affected, allowing time for a full and meaningful response.
