The area feels like it's in managed decline - badly managed. My road is no longer swept, the pavement is full of glass and there is zero interest from the local councillors to improve anything, they're all too busy in internicine squabbles about which party can be more useless. Shops have closed and don't get reopened - even charity shops are going out of business. The local community is beyond fed up paying for a mess other people made without being able to see a single repurcussion - no councilors get fired. They just step down and then trade jobs a bit. All of 2 senior staff from the council were booted out, but they get their pay off and continue their careers whilst we all suffer the continuing effects of their incompetence.

I think the whole council should be up for election each year. Not this rotation nonsense, I also don't see why wards need 3 cllrs when barely any of them visibly do any actual work. I also want to see some proper action taken to punish those involved in this whole debacle.

But I don't expect any of that to be listened too in the slightest.
