Related subject: Netherton

A strong objection to the positioning of Netherton in Huddersfield South. As stated numerous times on previous consultations, Netherton should be with South Crosland in order to reflect local issues. The new developments being built will increase voting numbers and we need representation for our community with common grounds.

One of our schools is even called South Crosland C Of E Junior School, there are strong links to the Church and we share transport links.

Whilst equal numbers in areas might be ideal it does not reflect the areas we live in and the issues we share. Splitting an area in two like this divides our communities.

This could be achieved by moving March into Lindley, Marsh has no links whatsoever with South Crosland in either locality, issues or community.

Please revise this frankly ludicrous division of wards.
