**Related subject:** New proposal for Heckmondwike ward

It agree that it makes sense to transfer Stubley Estate (north of Leeds Road) from Liversedge & Gomersal ward into the Heckmondwike ward, as this area has a connection with the rest of Heckmondwike, and addresses are all WF16 postcodes. However the new proposed ward boundary appears to run along the middle of Gomersal Road, which still leaves addresses on the west side of Gomersal Road, Heckmondwike WF16 9BU (property numbers 1-25) within Liversedge and Gomersal ward. It would make sense to include addresses on the west side of Gomersal Road within the new proposals which would fully reunite all parts of Heckmondwike into one ward.

I have shown on a map taken from the Kirklees local plan where I think the ward boundary line should be drawn in this area, which would include both sides of Gomersal Road [REDACTED] within the new proposal for Heckmondwike ward, which is only a small number of properties and would not have a significant detriment to the overall number of voters, but would create a better sense of inclusion and local identity being maintained
