**Related subject:** Netherton

Hi. I am shocked that these new boundaries will split a current parish council in two. Netherton and South Crosland are two linked villages, they share many institutions, including the Church, Club and importantly school. These proposals split not only these villages in half, but they actually split Netherton in half. This makes no sense whatsoever.

Netherton is currently lumped together with Crosland Moor and Thornton Lodge as it's council ward, this sees very little priority given to Netherton as councillors see the votes in the other areas and spend the majority of their time there, and funding delivered there.

Transport links are also better to other areas of Huddersfield, we would be much better linked to Honley and Meltham, where more people in the village socialise, work and are educated.

The village would be better suited in Holme Valley as this is where we are geographically. I am aware this has been rebuffed due to numbers, but populations are growing and this proposal to move into the different ward is poorly thought through, with no thought for the history and current situation of the people in the area.
