**Related subject:** To reject the draft proposals for new wards in Kirklees.

Can you please reconsider the preposterous proposal for the new wards in Kirklees. This will affect where my children go to school and our Doctors. I have poor mental health which would be made 1 million times worse by having to change Doctors. Kirklees Council have made a jungle out of Birkby, Bradley and the surrounding areas. We currently live in Birchcliffe/ Prince Royd and are quite happy to do so. I will be actively looking to vacate this area should the proposals go ahead. I have worked since I was 15 years old. I have paid my Council Tax to Kirklees since it was applicable to myself. It's absurd that this proposal is trying to sneakily go ahead without residents who will be affected being fully informed. I know it would have taken a lot of common sense and decency for Kirklees to have wrote to the affected residents and asked them to vote individually on such a proposal, but surely enough sense could have been scraped together for this. I whole heartedly reject and disagree with this proposal and I hope it doesn't go ahead. If it had not been for a resident posting this in our local Facebook group I would not have any idea this proposal had been put forward. Its quite shameful and disheartening that our local council would go about this proposal in such a way. If I wanted my family to grow up in those areas we would have resided there long ago. This area is one of the only areas Kirklees Council have not yet totally ruined aside of the Holmfirth area. Please do not go ahead with this. We reject it completely.
