Comment text:

Given that our current Council is hugely inept and all its predecessors have been for over twenty years what will reducing their number do to ensure local governance is of the highest quality? The current Council has literally given away land used for farming for generations to developers. There isn't enough scrutiny about land use. The infrastructure of this small promontory cannot support the number of the wrong type of new builds being thrust upon us, even though there is no local need. We are being swamped from outside the area, farmland, which should be for food, is either being tarmaced or built on. Our seas are increasingly full of sewage because of our antiquated sewers struggling to cope with the existing population. Our Council is corrupt, badly run and too many backhanders given from unscrupulous developers. We have no decent leisure facilities. Our Theatre Royal quietly deteriorates, The Winter Gardens, apparently up for lease, is so far gone no one will take it on. Money comes in but it is rarely managed properly. The historic Seaside Shelters have been awarded money for restoration but the Council have no plan, once restored, to protect them from vagrants who have openly vandalised them and set fire to them in the past. Indeed, the current councillor said they couldn't be protected!! When shown examples of other Councils use of protection orders and joint working with Police we were told TDC couldn't and wouldn't use such orders!! The fence sitting that goes on currently at TDC means nothing is valued, the lunatics run the asylum! Will these changes stop that??? Doubtful
