**Related subject:** Boundary changes to Birdwell

The proposal of the boundary through Birdwell is sad in as much it will divide a village. village welfare has historically been import and successful in maintaining communities however appears to be ignored in the proposed boundary changes. Birdwell people should be in the same boundary, not divided to support community cohesion. The proposed change could potentially create financial and physical implications for residents. Leave Birdwell Within one boundary not divide it. This imposition would have implications for many residents and appears unfair to a community, having wider social impacts for all, it will affect housing, voting, social care, health services, school placements, gp, constitutional arrangements as well as imposing overall massive unnecessary financial changes /implications at a time when this is not necessary.
