**Related subject:** Loughton and Shenley Church End, Shenley Brook End

Having looked at the proposed changes it doesn't make sense to me why you are splitting estates up. This part of MK is built on the grid system and it works well. Why therefore would you consider splitting Furzton and Emerson Valley in two following the linear park. The park doesn't divided the community by enhances it. People living in these areas will consider themselves part of Furzton and Emerson and not part of Bletchley. This doesn't make sense at all.

Equally why would you separate one estate out from Loughton and Shenley - again this doesn't make any sense from a local perspective. There is a clear boundary in the H4 so Grange Farm should be part of Loughton and Great Holm - they don't relate to Stony Stratford at all.

Please take these comments into consideration. I also think that you need to find a better way of letting residents know what is proposed and the arguments for change.
