Comment text:

Good evening,

Re southwest middlesbrough Brookfield and Trimdon ward

We have recently been informed by neighbours of the proposed boundary changes affecting the field in front of our house.

We live at [REDACTED] and have done so for almost 7 years. The house was in quite a state when we bought it but to be completely honest it was the field in front of it that sold it to us. Buy the worst house on the best street as my mam liked to say. It is now our dream home after much renovations, as is the idea of our children growing up being able to use the field in front of us. We are expecting our first child in the middle of September and find it extremely worrying that the proposed boundary change may go ahead. Why on earth would anyone think it is acceptable to keep our ward the same yet change the ward of which the field would be (I am referring to Newfield meadows) this would make us very vulnerable to future building on it, which to be honest is a disgrace. There are hardly any fields around the Acklam area nowadays so the idea that even less will be there for yet more unaffordable housing really just sums politics up in my eyes.

Many thanks

[REDACTED]
