Related subject: Boundary Commission Consultation Olton Ward (Scott Road, Fernhill Road and Richmond Road area)

My question or question relates to the personal impact to the value of my property moving from Olton to Lyndon.

Is there a discernible difference in property values with the re-drawing of the boundary lines for impacted individuals? Has this analysis been completed and to what extent are those individuals impacted financially? If there is a financial consequence? If so how is this being managed with impacted individuals? Negative property valuations should be identified and informed to impacted individuals in advance of any change to allow for full and proper consultation and consideration to be completed. I am also assuming that from the lines being re-drawn that there will not be any impact to regular services such as waste disposal or is this also an impact consideration that will need to be informed? What are all the identified impacts as a result of this change and where have these been articulated for impacted individuals to review and respond?
