## Comment text:

**Related subject:** New ward boundaries

I think the decision on this 'proposal' needs to reflect the needs by using the public health insight team AND aspirations of the area Using in person consultation doing door knocks through connectors team from involve Northwest. This way you would have a clear consensus as well as ideas for councillors to work on, whilst talking to people day and night not just the small minority who are disgruntled and seem to get the most attention.

Look at what's strong in wards and if things can't happen ....articulate them accurately and without jargon (manage expectations and raise aspirations) best wishes
