I agree with the proposal for the area. I would further like to suggest that each area has only one representative. CEC needs to significantly reduce the operating cost. To avoid cutting essential services we should first consider reducing the overall salary/pension/expenses bill. By moving to one representative per area this will go a long way to balancing the budget. I acknowledge that this could potentially mean longer lead times for some things due to increased workload, but a good communication exercise would help to manage expectations of the residents. Given a choice of closing facilities or operating with reduced numbers of representatives I believe most people would opt for the latter.
