## Comment text:

While I appreciate splitting into smaller wards gives us easier accountability and better management, the proposed split appears very random at first glance. Why does Manor Park North, Longridge and Shaw Heath get split (basically dumped) separately while the rest of the Knutsford remains intact? This doesn't look like a geographic split and feels like a high income/ low income split instead. I'd urge the committee to reconsider the new boundaries and make it a true geographic split.
