The town of Wellington has experienced a lot of growth in recent years and its boundaries no longer accurately reflect its reach. The Parish boundary has cut offs that would mean that some future developments (e.g. between Cadeside campsite and Chelston Business Park) may be placed technically outside of the council area but the residents of these developments would use the town's facilities, though no S106 funding from the development would reach the Town Council.

The Division boundary cuts off a large portion of the town, including an area that is in the process of development. The Division boundary should match the Parish Boundary to avoid confusion.
