Why is there the perceived need to burden the taxpayer with more representatives?

Local residents desire effective efficient representatives who deliver what the community needs within the budget's they have.

Having more representatives immediately increases costs and reduces services or forces up taxes.

If the current representatives struggle or cannot deliver for the county, why is it believed more representatives will do a better job? They will not, only different representatives might.

Don't give us more people trying to be 'chiefs'. Give us people who will efficiently deliver for the County.
