**Related subject:** Boundary changes within great broughton

I live on Derwent forest estate in great broughton I noticed the change in boundary now excluding us from great broughton.

I have two children one which is in great broughton primary preschool and will be attending school there from September and another who will be starting preschool there the following year. There is pavement from our estate to walk into great broughton which is only a short walk, this change now impacts the coherence of the community. I cannot safely access broughton moor on foot and have no community feeling towards this area.

Locally we attend community events and involved in school activities within great broughton. This change would create division. Community connection is key especially for a young family in the village.

I hope this will be reconsidered
