Related subject: Reside in College ward / comments on the proposed college & Blackwell ward

As a resident of Darlington for numerous years I do not agree with the proposal for the new college and Blackwell ward. I feel that grange road is a natural boundary and that South Park is park of the Bedford street/ park side area. I do not consider it as part of Blackwell and growing up as a child around the South Park I would never have felt part of Blackwell due to the main roads that I feel act as that boundary. I also do not agree with the town centre being included as part of this proposal. The town centre in my opinion should have its own ward. It is a completely different area and type of area to the Blackwell and college area and should have its own focus. There are more areas than the college ward that have the transport links into the town so do not agree with that being a reason to include it together. The focus on transport should be to improve and mange services to all areas of the town and not pick out the college ward. If you stand in the South Park or the town centre I would consider myself as part of the college and Blackwell wards, there are too many natural boundary's separated these areas and they are too different in The make up of these wards completely. There would be more of an argument to include Hummersknott and Mowden with the college ward and blackwell wards if the college ward is to be extended further. I agree with the proposal for Blackwell and college wards to be merged. Thanks.
